

December 20, 2010

Dear Friend of the Triangle Consortium for Reproductive Biology,

You are invited to be a sponsor of our Annual Meeting to be held Saturday, February 26, 2011 at the National Institute of Environmental Sciences in Research Triangle Park. This year our theme is "Gamete Development and Function". Aaron Hsueh, PhD, Stanford University will be the plenary speaker "Activation of dormant ovarian follicles and hormonal regulation of early embryonic development"

The Triangle Consortium of Reproductive Biology (TCRB) meeting is attended by over 250 scientists, fellows and students who conduct research on reproduction, and male and female reproductive tract diseases from area universities and institutions and therefore presents an opportunity for your company to inform attendees of your products and services. The 2011 program agenda is attached which reveals the depth of reproductive science being conducted in the Triangle at places such as UNC, NIEHS and Duke among others. In addition to researchers from these institutions scientists from NCSU, EPA, NCCU, East Carolina University, Wake Forest University, UNC Greensboro, Appalachian State University and area pharmaceutical companies will present their work.

We meet for a continental breakfast and stay for lunch which represents an opportunity for networking. We have three levels of sponsorship: Bronze - \$100-500; Silver - \$501-1000 and Gold - over \$1001. All sponsors will be given space to exhibit products and to display literature and will be acknowledged during the welcome address and in the program booklet. Sponsors donating greater than \$500.00 will be given a full page color ad to be included in the program booklet.

The Research Triangle area of NC has a large concentration of nationally and internationally known reproductive scientists and many young scientist and fellows committed to a career in reproduction and reproductive health. Sponsorship of this meeting is a wonderful way to inform them of your company's products and services.

Please contact me for additional information. All donations are to be made payable to Triangle Consortium for Reproductive Biology and send c/o Ms. Rhonda Reaves, Department of Obstetrics and Gynecology, 212 Baker House Duke University, Box 3279, DUMC, Durham, NC, 27710.

Sincerely yours,

Phyllis Leppert, MD, PhD, Program Coordinator, TCRB Annual Meeting

2011 Meeting Committee members:

Friederike Jayes, DVM, PhD, David Schomberg, PhD, William Wetsel, PhD
